The twenty-first century has seen the emergence of a new style of man: the metrosexual. Overwhelmingly straight, white, and wealthy, these impeccably coiffed urban professionals spend big money on everything from facials to pedicures, all part of a multi-billion-dollar male grooming industry. Yet as this innovative study reveals, even as the industry encourages men to invest more in their appearance, it still relies on women to do much of the work. *Styling Masculinity* investigates how men's beauty salons have persuaded their clientele to regard them as masculine spaces. To answer this question, sociologist Kristen Barber goes inside *Adonis* and *The Executive*, two upscale men's salons in Southern California. Conducting detailed observations and extensive interviews with both customers and employees, she shows how female salon workers not only perform the physical labor of snipping, tweezing, waxing, and exfoliating, but also perform the emotional labor of pampering their clients and pumping up their masculine egos. Letting salon employees tell their own stories, Barber not only documents occasions when these workers are objectified and demeaned, but also explores how their jobs allow for creativity and confer a degree of professional dignity. In the process, she traces the vast network of economic and social relations that undergird the burgeoning male beauty industry.

This anthology collects some of the year's best science and nature writing—from climate change to killer beetles, an exposé of nail salons, and more. As guest editor Amy Stewart says in her introduction, "science writers get into the game

with all kinds of noble, high-minded ambitions. We want to educate. To enlighten...But at the end of the day, we're all writers. We're just like novelists, memoirists, and poets. We're entertainers." The writers in this anthology pull off that wonderful feat of turning hard research into page-turning narrative. From a Pulitzer Prize-winning essay on the earthquake that could decimate the Pacific Northwest to the astonishing work of investigative journalism that transformed the nail salon industry, this is a collection of hard-hitting and beautifully composed writing on the wonders, dangers, and oddities of scientific innovation and our natural world. The Best American Science and Nature Writing 2016 includes Kathryn Schulz, Sarah Maslin Nir, Charles C. Mann, Oliver Sacks, Elizabeth Kolbert, Gretel Ehrlich, and others.

A provocative description of the power of population change to create the conditions for societal transformation. As the world nears 8 billion people, the countries that have led the global order since World War II are becoming the most aged societies in human history. At the same time, the world's poorest and least powerful countries are suffocating under an imbalance of population and resources. In *8 Billion and Counting*, political demographer Jennifer D. Sciubba argues that the story of the twenty-first century is less a story about exponential population growth, as the previous century was, than it is a story about differential growth—marked by a stark divide between the world's richest and poorest countries. Drawing from decades of research, policy experience, and teaching, Sciubba employs stories and statistics to explain how demographic trends, like age structure and ethnic composition, are crucial signposts for future violence and peace, repression and democracy, poverty and prosperity. Although we have a diverse global population, demographic trends often follow predictable patterns that can help professionals across the corporate, nonprofit, government, and military sectors understand the global strategic environment. Through the lenses of national security, global health, and economics, Sciubba demonstrates the pitfalls of taking population numbers at face value and extrapolating from there. Instead, she argues, we must look at the forces in a society that amplify demographic trends and the forces that dilute them, particularly political institutions, or the rules of the game. She shows that the most important skills in demographic analysis are naming and being aware of your preferences, rethinking assumptions, and asking the right questions. Provocative and engrossing, *8 Billion and Counting* is required reading for business leaders, policy makers, and anyone eager to anticipate political, economic, and social risks and opportunities. A deeper understanding of fertility, mortality, and migration promises to point toward the investments we need to make today to shape the future we want tomorrow.

The third edition of the foundational volume in Asian American studies *Who are Asian Americans? Moving beyond popular stereotypes of the "model minority" or "forever foreigner,"* most Americans know surprisingly little of the nation's fastest growing minority population. Since the 1960s, when different Asian immigrant groups came together under the "Asian American" umbrella, they have tirelessly carved out their presence in the labor market, education, politics, and pop culture. Many times, they have done so in the face of racism, discrimination, sexism, homophobia, and socioeconomic disadvantage. Today, contemporary Asian America has emerged as an incredibly diverse population, with each segment of the community facing its unique challenges. When *Contemporary Asian America*

was first published in 2000, it exposed its readers to the formation and development of Asian American studies as an academic field of study, from its inception as part of the ethnic consciousness movement of the 1960s to the systematic inquiry into more contemporary theoretical and practical issues facing Asian America at the century's end. It was the first volume to integrate a broad range of interdisciplinary research and approaches from a social science perspective to assess the effects of immigration, community development, and socialization on Asian American communities. This updated third edition discusses the impact of September 11 on Asian American identity and citizenship; the continued influence of globalization on past and present waves of immigration; and the intersection of race, gender, sexuality, and class on the experiences of Asian immigrants and their children. The volume also provides study questions and recommended supplementary readings and documentary films. This critical text offers a broad overview of Asian American studies and the current state of Asian America.

Whether you're changing jobs, joining a group, or moving to a new city, putting yourself out there in new situations is no picnic. Being forced to introduce yourself . . . Having to ask questions among strangers . . . Learning expectations of those around you--it's not fun for anyone! But when we let our worries stop us from getting familiar with our surroundings and learning the dos and don'ts of our new environment, we seriously hinder our progress, our joy, and the many exciting opportunities that await us. *What to Do When You're New* combines the author's research and firsthand experience from having to adjust to a job transfer to Japan with that of leading scientists to explain why we are so uneasy in new situations--and how we can learn to become more confident and successful newcomers. With practice, anyone can learn the necessary skills to learn how to: □ Overcome fears □ Make great first impressions □ Talk to strangers with ease □ Get up to speed quickly □ Connect with people wherever you go Blending stories and insights with simple techniques and exercises, this invaluable guide for the introvert will get you out of your comfort zone and trying new things in no time.
