If you are one of those who love technology, not for technology's sake, but for what it can do for you, and if you want to be able to say that you "Know Computers" instead of "No Computers", this is the book for you! A First Course in Computers is a computer manual, quick guide, helpdesk and your computer teacher, all rolled in one. Just keep the book in front of you, look at the sample exercises given at the beginning of each section and start following the step-by-step visual instructions to complete the exercise. Learn easily and effectively—learn by doing. THIS BOOK COVERS Computer Background: Get to know a brief history of computers, different parts of a computer... Basic Terms and Concepts: Demystify the computer jargon—bits & bytes, hardware & software, memory & storage... Windows 8: Commonly used features and how to get the maximum out of them. How to customize your PC to your needs and preferences. Windows 8.1: What's new, as compared to Windows 8. MS Word: Create aesthetically appealing documents—letters, reports, memos, faxes, etc.—quickly and easily. Do spell check and mail merge, create office and personal templates, and a lot more... MS Excel: Create highly functional spreadsheets, involving tables, graphs and Clip Art images. Sort, filter and query data based upon single or multiple criteria... MS PowerPoint: Create effective and visually appealing presentations using text, graphs, movie & animation clips, images, organization charts, etc. Internet: What is Internet, how to set up a TCP/IP account and configure a modem, surf the Net, create free email accounts, send and receive emails, search the Web for jobs, friends, products, services or any subject, Internet chat and telephony...

Focuses on the use of a digital camera and the peripheral devices that go along with the art. This work covers scanning, manipulation and artistic effects, and aims to help users make most of their digital camera. It includes topics such as taking photos, scanning and storage, printing and sharing budget considerations, and choosing a camera.

After World War II, tracing and documenting Nazi victims emerged against the background of millions of missing persons and early compensation proceedings. This was a process in which the Allies, international aid organizations, and survivors themselves took part. New archives, documentation centers and tracing bureaus were founded amid the increasing Cold War divide. They gathered documents on Nazi persecution and structured them in

specialized collections to provide information on individual fates and their grave repercussions: the loss of relatives, the search for a new home, physical or mental injuries, existential problems, social support and recognition, but also continued exclusion or discrimination. By doing so, institutions involved in this work were inevitably confronted with contentious issues—such as varying political mandates, neutrality vs. solidarity with those formerly persecuted, data protection vs. public interest, and many more. Over time, tracing bureaus and archives changed methods and policies and even expanded their activities, using historical documents for both research and public remembrance. This is the first publication to explore this multifaceted history of tracing and documenting past and present.

The bestselling CompTIA A+ reference and test preparation guide—fully revised for the new 2012 exam topics Written by the leading authority on CompTIA A+ certification and training, the new edition of this trusted resource offers complete, up-to-date coverage of CompTIA A+ exams 220-801 and 220-802. Welcome to the Proceedings of ICCHP 2010! We were proud to welcome participants from more than 40 countries from all over the world to this year's ICCHP. Since the late 1980s, it has been ICCHP's mission to support and reflect development in the field of "Assistive Technologies," eAccessibility and eInclusion. With a focus on scientific quality, ICCHP has become an important reference in our field. The 2010 conference and this collection of papers once again fulfilled this mission. The International Programme Committee, comprising 106 experts from all over the world, selected 147 full and 44 short papers out of 328 abstracts submitted to ICCHP. This acceptance ratio of about half of the submissions demonstrates our strict pursuit of scientific quality both of the programme and in particular of the proceedings in your hands. An impressive number of experts agreed to organize "Special Thematic Sessions" (STS) for ICCHP 2010. These STS help to bring the meeting into sharper focus in several key areas. In turn, this deeper level of focus helps to collate a state of the art and mainstream technical, social, cultural and political developments.
