Unleash innovation potential with creative, serious play Building a Better Business Using the LEGO® SERIOUSPLAY® Method delivers a creative approach to enhancing innovation and improving business performance, with the focus on unleashing play. Written by the two original Master Trainers for LEGO SERIOUS PLAY (LSP), the book outlines how LSP can

development, teams, people, relationships and business. Based on the merging of play with organizational development, systems thinking and strategy development, LSP can foster improved meetings, faster innovation processes, team growth, and better communication. The belief that everyone intends to "do good" and has the potential to do it is at the heart of LSP. The method nurtures the idea that everyone in an organization can contribute to discussions and outcomes. Building with LEGO bricks is a type of creative play that triggers a different kind of thought process, unleashing imagination and potential that is frequently untapped by the logical mind. The book explains this hands-on, minds-on approach, and discusses the theory as well as the practical implementation of LSP. Topics include: Observation of internal and external interaction dynamics Fostering a free and honest exchange of opinions Suspending hierarchy for better, more effective communication Facilitating change by encouraging exploration The LEGO SERIOUS PLAY method is employed by start-ups and multinational corporations alike to maximize synergy among teams and throughout organizations. For leaders looking to boost effectiveness and see better results, Building a Better Business Using the LEGO® SERIOUS PLAY® Method is a comprehensive introduction to this creative management technique.

The first in a series of books by Zingerman's co-founding partner Ari Weinzweig examines the basic building blocks of the culture and structure we know now as Zingerman's. These approaches are applicable whether you're running a law office, a library, a restaurant, a record label, a software firm, or an organic farm. They are the behind-the-scenes "secret" stuff that goes into making a very special, sustainable business of any kind. Inc. Magazine calls it one of the Best Books for Business Owners.

A compelling look at the B Corp movement and why socially and environmentally responsible companies are vital for everyone's future. Businesses have a big role to play in a capitalist society. They can tip the scales toward the benefit of the few, with toxic side effects for all, or they can guide us toward better, more equitable long-term solutions. Christopher Marquis tells the story of the rise of a new corporate form—the B Corporation. Founded by a group of friends who met at Stanford, these companies undergo a rigorous certification process, overseen by the B Lab, and commit to putting social benefits, the rights of workers, community impact, and environmental stewardship on equal footing with financial shareholders. Informed by over a decade of research and animated by interviews with the movement's founders and leading figures, Marquis's book explores the rapid growth of companies choosing to certify as B Corps, both in the United States and internationally, and explains why the future of B Corporations is vital for us all.

In this manifesto-style book, radical economist and strategist Umair Haque calls for the end of the corrupt business ideals that exemplify business as usual. His passionate vision for "Capitalism 2.0," or "constructive capitalism," is one in which old paradigms of wasteful growth, inefficient competition, and self-destructive ideals are left far behind at this reset moment. According to Haque, the economic crisis was not a market failure or even a financial crisis, but an institutional one. Haque details a holistic five-step plan for both reducing the negative and exploitive nature of the current system and ensuring positive social and economic growth for the future. Haque calls for a reexamination of ideals, and urges business away from competition and rivalries and toward a globally-conscious and constructive model—and a constructive future. Haque argues that companies must learn to orient their business models around: - renewal in order to maximize efficiency - equity in order to maximize productivity - meaning in order to maximize effectiveness - democracy in order to maximize agility - peace in order to maximize evolvability These new business ideals focus on the human element - not profit exclusively - and are easily tailored for any size or type of business, as long as they are willing to make bold and sustained changes to the current system.
