for coining the terms
hypertext and

Machines By Theodor H Nelson

At a time when computers were a short step removed from mechanical data processors, Licklider was writing treatises on "human-computer symbiosis," "computers

as communication devices," and a now not-so-unfamiliar "Intergalactic Network."

His ideas became so influential, his passion so contagious, that Waldrop coined him "computing's Johnny Appleseed." In a simultaneously compelling personal narrative and comprehensive

Waldrop tells the story

instigated the work that
led to the internet, but
also shifted our
understanding of what
computers were and

Provides a history of the
computer and its
industry, discussing
such topics as the rise of
