It is often only years after the commission of core international crimes that prosecutions and investigations take place. This anthology addresses challenges associated with such delayed justice: the location, treatment, and assessment of old evidence. Part I considers the topic from the perspective of different actors involved in the prosecution of core international crimes at the domestic and international levels. Part II comprises chapters focusing on the efforts of the Bangladeshi authorities to investigate and prosecute international crimes perpetrated during the 1971 war. This book brings together experienced judges, prosecutors, lawyers, scientists, and commentators who have dealt with questions of old evidence in their work. Among the contributors are Shafique Ahmed, Andrew Cayley, David Cohen, Seena Fazel, Siri S. Frigaard, M. Amir-UI Islam, Md. Shahinur Islam, Agnieszka Klonowiecka-Milart, Alphons M.M. Orié, Stephen J. Rapp, Patrick J. Treanor, Otto Triffiterer and Martin Witteveen. The chapters describe the challenges encountered in practice and suggest concrete solutions that can be tailored to fit the circumstances of the case or country. By providing a comprehensive analysis of the relevant problems in this area and a variety of views, this anthology will serve as an invaluable resource for criminal justice actors and researchers seeking to address questions of old evidence.

This Education Sector Review covers many major educational topics in Bangladesh. Six actions are needed to realize Bangladesh's vision in 2020: build a stronger, wider and deeper foundation of basic education; reorient and establish secondary education on a more equitable footing; transfer vocational skill training to non-government providers; rationalize, reform and revitalize higher education; vastly increase public financing of education; and manage the system better. Volume 1: addresses the above six actions as well as socioeconomic development, implications for education, and education finance. Volume 2 examines in depth primary and pre-primary education; early childhood care and education for development; non-formal education; secondary; and higher secondary education. Volume 3: focuses on technical vocational education and training; and higher education.

In recent times, there has been intense global interest on and scrutiny of Islamic education. In reforming Islamic schools, what are the key actions initiated and are they contested or negotiated by and among Muslims? This edited collection brings together leading scholars to explore current reforms in Islamic schools. Drawing together international case studies, Reforms in Islamic Education critically discusses the reforms, considering the motivations for them, nature of them and perceptions and experiences of people affected by them. The contributors also explore the tensions, resistance, contestations and negotiations between Muslims and non-Muslims, and among Muslims, in relation to the reforms. Highlighting the need to understand and critique reforms in Islamic schools within broad historical, political and socio-cultural contexts, this book is a valuable resource for academics, policymakers and educators.
