build an interface to retrieve and report on your data. This course is designed for the absolute beginner; no prior database design or Microsoft Access experience is necessary in order to get the most out of this video tutorial. Starting with a tour of the interface, this computer based training video will show you how to design and create a table, build queries, and comprehensively demonstrates the creation, and functions, of forms and reports. As you move through the video tutorial, Guy covers other topics such as; how to create advanced forms, customizing your reports, and building action queries. Finally, he will take you through the process of creating your own custom web app with Access 2013. By the completion of this training course, you will be capable of creating databases as well as reports and forms in Microsoft Access 2013, and you will have in-depth knowledge of the tools and functions available to you
