Barron's Regents Exams and Answers: Living Environment provides essential review for students taking the Living Environment Regents, including actual exams administered for the course, thorough answer explanations, and comprehensive review of all topics. This edition features: Four actual Regents exams to help students get familiar with the test format Comprehensive review questions grouped by topic, to help refresh skills learned in class Thorough explanations for all answers Score analysis charts to help identify strengths and weaknesses Study tips and test-taking strategies Looking for additional practice and review? Check out Barron's Regents Living Environment Power Pack two-volume set, which includes Let's Review Regents: Living Environment in addition to the Regents Exams and Answers: Living Environment book.

Expand your students' content-area vocabulary and improve their understanding with this roots-based approach! This standards-based resource, geared towards fourth grade, helps students comprehend informational text on grade-level topics in science, social studies, and mathematics using the most common Greek and Latin roots. Each lesson provides tips on how to introduce the selected roots and offers guided instruction to help easily implement the activities. Students will be able to apply their knowledge of roots associated with specific subject areas into their everyday vocabulary.

Take your students beyond mere memorization of words by taking a roots approach to learning! This resource, geared towards fourth grade students, focuses on root words for specific content areas such as science or social studies.

Hands-on, inquiry-based, and relevant to every studentOCO's life, Gourmet Lab serves up a full menu of activities for science teachers of grades 6OCO12. This collection of 15 hands-on experimentsOCoeach of which includes a full set of both student and teacher pagesOCOchallenges students to take on the role of scientist and chef, as they boil, bake, and toast their way to better understanding of science concepts from chemistry, biology, and physics. By cooking edible items such as pancakes and butterscotch, students have the opportunity to learn about physical changes in states of matter, acids and bases, biochemistry, and molecular structure.The Teacher pages include Standards addressed in each lab, a vocabulary list, safety protocols, materials required, procedures, data analysis, student questions answer key, and conclusions and connections to spur wrap-up class discussions. Cross-curricular notes are also included to highlight the lessonOCO's connection to subjects such as math and literacy. Finally, optional extensions for both middle school and high school levels detail how to explore each concept further. What better topic than food to engage students to explore science in the natural world?"

Making Connections in Elementary and Middle School Social Studies, Second Edition is the best text for teaching primary school teachers how to integrate social studies into other content areas. This book is a comprehensive, reader-friendly text that demonstrates how personal connections can be incorporated into social studies education while meeting the National Council for the Social Studies' thematic, pedagogical, and disciplinary standards. Praised for its "wealth of strategies that go beyond social studies teaching," including classroom strategies, pedagogical techniques, activities and lesson plan ideas, this book examines a variety of methods both novice and experienced teachers alike can use to integrate social studies into other content areas.

With the increasing focus on science education, growing attention is being paid to how science is taught. Educators in science and science-related disciplines are recognizing that distance delivery opens up new opportunities for delivering information, providing interactivity, collaborative opportunities and feedback, as well as for increasing access for students. This book presents the guidance of expert science educators from the US and from around the globe. They describe key concepts, delivery modes and emerging technologies, and offer models of practice. The book places particular emphasis on experimentation, lab and field work as they are fundamentally part of the education in most scientific disciplines. Chapters include: * Discipline methodology and teaching strategies in the specific areas of physics, biology, chemistry and earth sciences. * An overview of the important and appropriate learning technologies (ICTs) for each major science. * Best practices for establishing and maintaining a successful course online. * Insights and tips for handling practical components like laboratories and field work. * Coverage of breaking topics, including MOOCs, learning analytics, open educational resources and m-learning. * Strategies for engaging your students online. A companion website presents videos of the contributors sharing additional guidance, virtual labs simulations and various additional resources.

Take your students beyond mere memorization of words by taking a roots approach to learning! This resource, geared towards fourth grade students, focuses on root words for specific content areas such as science or social studies.
