Occupational Health Practice, now in its 4th edition, presents a modern approach to the practice of occupational health and occupational medicine, concentrating particularly on those aspects relevant to present day and future practice. A new co-author together with experienced international authors bring this edition in line with current occupational health thinking. With many new chapters and complete revision of existing chapters, occupational health professionals in training and in practice will welcome this new edition.

This fourth edition continues to provide a link between occupational health and clinical practice. It covers target organ systems that can be affected by hazardous exposures in workplaces, and it focuses on the clinical presentations, investigations and management of affected individuals. We have retained consideration of some special issues relevant to occupational medicine practice in this new edition. The main emphasis continues to be prevention of disease and early detection of health effects. This edition of the book has been updated to include new materials, topics, and references. We have retained a few of the previous case studies and illustrations, and introduced several new ones. There are new chapters on audit and evidence-based practice and on occupational cancer. We trust that this edition addresses many of the recommendations that were provided by readers of the previous edition. We have again asked international experts to author many of the chapters. Some of the authors are from Asia, and others from the US, UK, the Middle East and Australia. All the authors will have either clinical or academic experience in occupational medicine practice. The book will be of interest to medical practitioners, especially those in primary care and doctors intending to pursue a career in occupational medicine. It would also be relevant for non-medical health and safety professionals wanting to know more about health effects resulting from occupational exposures. Other groups who may find this edition useful as a ready reference are medical students, occupational health nurses, or clinical specialists in fields such as dermatology, respiratory medicine or toxicology. The book is targeted at all those who are interested in the interaction between work and health, and how occupational diseases and work-related disorders may present. Contents:Clinical Occupational Medicine:Work and Health (David Koh and Aw Tar Ching)Diagnosis and Management of Occupational Diseases (Aw Tar Ching, David Koh and John P Thompson)Respiratory Disorders (David Fishwick and Chris Barber)Skin Disorders (David Koh and Goh Chee Leok)Mental Health Disorders (Ken Adley and Robert Kerr)Musculoskeletal Disorders (Keith Palmer, Jane Frølund Thomsen and Sigurd Mikkelsen)Auditory Disorders (Ailin Razali and Krishna Gopal Rampal)Hematological Disorders (Ng Wee Tong and Mark Newson-Smith)Neurological Disorders (Ian Brown and Arjune Sen)Occupational Infections (Rayhan Hashmey and Aw Tar Ching)Renal Disorders (Huw Rees, Doris T Chan and Steve Riley)Cardiovascular Disorders (Mikhail S Dzheshka, Eduard Shantsila and Gregory Y H Lip)Hepatobiliary and Gastrointestinal Disorders (Ian Brown and Jane Collier)Eye Injuries and Other Disorders (Laurence Lim Shen and Wong Tien Yin)Metabolic Disorders (Tng Eng Loon and Lee See Muah)Reproductive Disorders (Lim John Wah and David Koh)Occupational Cancers (Lin Fritschi and Alison Reid)Special Issues in Occupational Medicine:Ethics in Occupational Medicine (David Koh and Lee See Muah)Occupational Medicine Practice and the Law (Lee See Muah and David Koh)Audit and Evidence-Based Occupational Medicine Practice (Yue-liang Leon Guo)Health Screening and Periodic Medical Examinations (Aw Tar Ching and David Koh)Aviation Medicine (Brian See and Gan Wee Hoe)Diving Medicine (Gregory Chan Chung Tsing)Remote Health Care (John Nelson Norman)Medical Disasters Planning and Response (Halim Mohamed and Abu Hasan Samad)Communication in Occupational Medicine (Max Lum)Cultural Aspects of Occupational Medicine Practice (Adui Bandhuku)Workers' Compensation Schemes (Paul Cullinan)Rehabilitation and Return to Work (Werys Williams)Prevention of Occupational Diseases (David Koh and Aw Tar Ching) Readership: Serves as a useful guide for all those who are interested in occupational medical practice. These include medical students at various levels, occupational health nurses, general practitioners, researchers or colleagues and professionals in occupational and public health and safety — in other words, for all who have committed themselves to do the best practice for the health of working people.

This book provides a link between occupational health and clinical practice. It aims to provide a valuable starting point for health professionals with an interest in occupational medicine as well as those intending to specialize in occupational medicine. It will also serve as a useful guide for all those who are interested in occupational medical practice. These include medical students at various levels, occupational health nurses, general practitioners, or colleagues and professionals in occupational health and safety in other words, for all who have committed themselves to do the best practice for the health of working people. This third edition of the textbook has been fully revised and includes new materials and chapters. The contents of the book have been streamlined to appear in two sections. The approach of examining occupational health issues and concerns from the standpoint of clinical presentations of the different organ systems is retained. These clinically oriented chapters form Section One. Section Two comprises issues of special interest to occupational health practitioners such as screening and routine medical examinations, assessment of disability for compensation, medical planning and management of industrial disasters, occupational medicine practice and the law, and the prevention of occupational diseases. Several changes have directly resulted from feedback from readers of the previous editions. Among these are the inclusion of new chapters on occupational infections, metabolic disorders, and occupational medicine practice and the law. As before, case studies have been incorporated in the chapters to make clear the relevant issues.

The second edition of the Health and Safety Pocket Book has been fully revised and updated to include all the relevant legal, HSE ACoP/Guidance and practice references. It remains a handy reference tool for practising health and safety professionals, auditors, managers, HR personnel, employee representatives and anyone with health and safety responsibilities. The book is an essential compilation of guidance, data and checklists covering a wide range of health and safety topics, supported by extensive key glossary terms. The A-Z arrangement within the chapters and extensive cross-referencing make it easy to navigate, while its size and scope make it the ideal volume for ready reference and site visits. The book will also be useful for health and safety courses at all levels. Key features include: The principal health and safety legal requirements for every industry Safety management elements and systems Checklists for major hazards affecting all industries A wealth of charts, hard-to-remember details and data A glossary of the main concepts of health and safety A list of important health and safety courses, publications and organisations Revision tips for key examination themes.

The Health and Safety Pocket Book is a handy reference tool for practising health and safety professionals, auditors, managers, HR personnel, employee representatives and anyone with health and safety responsibilities. It is an essential compilation of guidance, data and checklists covering a wide range of health and safety topics, supported by extensive key glossary terms. The A-Z arrangement within the chapters and extensive cross-referencing make the book easy to navigate, while its size and scope make it the ideal volume for ready reference and site visits. The book will also be useful for health and safety courses at all levels. Key features include: The principal health and safety legal requirements for every industry Safety management elements and systems Checklists for major hazards affecting all industries A wealth of charts, hard to remember details and data A glossary of the main concepts of health and safety A list of important health and safety courses, publications and organisations Jeremy Stranks has over 40 years' experience in occupational safety and health enforcement, management consultancy and training. He is a founding member of NEBOSH and has lectured on all aspects of health and safety. His company Safety & Hygiene Consultants offers organisations advice in the preparation of Statements of Health and Safety Policy, risk assessment and safety monitoring procedures, together with in-house training for all levels of management. He also undertakes expert witness work in both criminal and civil cases.

Offering a balance of theory and practice, with guides for further reading, this is a clinical guide for the practitioner in the widest sense: physicians, nurses, occupational hygienists, safety officers, environmental, health officers and personnel managers. With coverage of both medicine and hygiene, and including sections on OH law, it is a primer for appropriate courses and provides all that the interested medical student would need to know.

Preparing for Professional Practice in Health and Social Care is the ultimate companion for students and newly qualified practitioners in occupational therapy, physiotherapy and other allied health professions. A multi-professional team of qualified and experienced contributors explain key concepts in professional practice within the contexts of health, social care and education systems. Topics range from law, ethics and client-centred practice to interprofessional working, team-building, communication skills and reflective practice. Further chapters provide practical guidance on writing a CV, applying for jobs and interview technique, as well as offering advice on career-planning and continuing professional development. KEY FEATURES clear definitions of key concepts case studies and examples from clinical practice summaries of key points self-assessment exercises references and further reading

The Encyclopedic Reference of Public Health presents the most important definitions, principles and general perspectives of public health, written by experts of the different fields. The work includes more than 2,500 alphabetical entries. Entries comprise review-style articles, detailed essays and short definitions. Numerous figures and tables enhance understanding of this little-understood topic. Solidly structured and inclusive, this two-volume reference is an invaluable tool for clinical scientists and practitioners in academia, health care and industry, as well as students, teachers and interested laypersons.

Advancing Occupational Therapy in Mental Health Practice looks at the contribution that occupational therapists make to the lives of clients living with mental illness. It examines current practice developments and the innovative research that is shaping occupational therapy within the mental health arena, nationally and internationally. The book employs a distinctive and engaging narrative approach, bringing to life key issues in practice and research. It introduces the reader to the mental health context, opening with a historical overview and then exploration of the current developments in occupational therapy before moving on to discuss the cultural context and the need for cultural sensitivity in practice. Service users and expert clinicians offer their narratives, through which the clinical utility and cultural appropriateness of existing occupational therapy concepts, assessments and outcome measures are discussed and the associated implications for practice highlighted. Advancing Occupational Therapy in Mental Health Practice introduces and explores a variety of specialised work contexts from practicing in acute inpatient settings to crisis intervention, home treatment, forensic mental health settings and the specialist role of occupational therapy in community mental health and social services. Chapters are enriched with case stories, personal narratives and guided reflection.

Throughout the world, scientists and the general with environmental illness. Part II presents an over public are concerned about the adverse effects of view of chemical and physical agents commonly toxic agents found in contaminated air, water, food, found in contaminated air, water, food, and soil. and soil. In the past, attention has focused on haz The problem of hazardous wastes is also discussed. ards originating in the workplace. As a consequence, Part III characterizes the body's defense against occupational medicine has become a well-recognized such exposure. Defenses at the portals of entry are and established clinical discipline. Much less atten discussed, with emphasis placed on the role of tion has been paid to nonoccupational hazards. There nutrition. Detoxication and immunologic defense is a growing awareness, however, of the dangers of mechanisms are described. Part IV indicates the exposure to toxic chemical and physical agents in importance of and provides instruction on the the homes, community, and general environment, method of including occupational and environmen especially for the fetus, the infant, the very young, tal factors in the routine medical history. The role of the elderly, and the chronically ill, those most sus enhanced susceptibility as a factor in an individual's ceptible. Environmental medicine, FOCUSing on the response to toxic exposure is discussed.
