The Olympus OM system was in production for such a long time (1972–2003) that it was used with 4 generations of Olympus compound microscopes: EH/FH, BH, BH-2 and BX. It is not easy to obtain information about discontinued Olympus microscopes, so I have collected all of the brochures, catalogues, instruction manuals and repair manuals that I can find, including ones for the compound and stereo ...

subterranean tissues of plants has shown an extensive scale of interactions between the hosts and a range of microbes, including bacteria and fungi. Intercellular spaces, vascular systems and even single cells can be inhabited by these endophytic microbes. Of the bacterial endophytes, only a small percentage is harmful to the plant; most are neutral, opportunistic or beneficial. These plant-based bacteria can have various important functions throughout the life cycle of the plant; some promote plant growth and development, others protect the plant from diseases. This ability to be able to protect plants from diseases has catalyzed numerous laboratories to search for new bacteria that could be utilized instead of the traditional plant-protective agents. Because two or more interacting organisms are involved, research and the eventual application of suitable bio-controlling microbes are challenging and often require specific skills and equipment. The purpose of this book is to provide a comprehensive review for those who are interested in the research and biotechnological applications of plant-associated bacteria. It also provides a compilation of current work conducted on plant-bacteria interactions.

The ABC of the Histology is intended to convey basic knowledge of human tissues by images analysis, using the standard technique of staining haematoxylin-eosin (H&E). The approach of the book is to simplify the concepts of a knowledge area somewhat difficult to convey, by analyzing 134 images, selected for the purpose of highlighting the fundamental concepts of Histology. In summary, the ABC of the tissues, which can be read and summarized in few hours. New chapters in this edition with inflammatory pathology, introduction to tumor pathology and immunohistochemical technique. Includes practical exercises

In this provocative thriller, forensic expert Kay Scarpetta is surrounded by familiar faces, yet traveling down the unfamiliar road of fame.... It is the week before Christmas. A tanking economy has prompted Dr. Kay Scarpetta—despite her busy schedule and her continuing work as the senior forensic analyst for CNN—to offer her services pro bono to New York City ’ s Office of the Chief Medical Examiner. In no time at all, her increased visibility seems to precipitate a string of unexpected and unsettling events, culminating in an ominous package—possibly a bomb—showing up at the front desk of the apartment building where she and her husband, Benton, live. Soon the apparent threat on Scarpetta ’ s life finds her embroiled in a surreal plot that includes a famous actor accused of an unthinkable sex crime and the disappearance of a beautiful millionaire with whom her niece, Lucy, seems to have shared a secret past. Scarpetta ’ s CNN producer wants her to launch a TV show called The Scarpetta Factor. Given the bizarre events already in play, she fears that her growing fame will generate the illusion that she has a “ special factor, ” a mythical ability to solve all her cases. She wonders if she will end up like other TV personalities: her own stereotype.

This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Preterm birth affects over 15 million newborns worldwide each year and is the main contributor of neonatal mortality and morbidity. While neonatal survival following preterm birth continues to improve, this has not been matched by a decline in neurological outcome. There is still a high prevalence of motor problems, executive dysfunction, and cognitive impairment in infants born preterm. Improved neuroimaging has helped to describe different types of neonatal brain injuries in this population and has given a better understanding of underlying pathogenesis. However, therapies are still lacking and there is a great need to find novel strategies to improve injury and functional outcome.

Functional Pavement Design is a collections of 186 papers from 27 different countries, which were presented at the 4th Chinese-European Workshops (CEW) on Functional Pavement Design (Delft, the Netherlands, 29 June-1 July 2016). The focus of the CEW series is on field tests, laboratory test methods and advanced analysis techniques, and cover analysis, material development and production, experimental characterization, design and construction of pavements. The main areas covered by the book include: - Flexible pavements - Pavement and bitumen - Pavement performance and LCCA - Pavement structures - Pavements and environment - Pavements and innovation - Rigid pavements - Safety - Traffic engineering Functional Pavement Design is for contributing to the establishment of a new generation of pavement design methodologies in which rational mechanics principles, advanced constitutive models and advanced material characterization techniques shall constitute the backbone of the design process. The book will be much of interest to professionals and academics in pavement engineering and related disciplines.
