Since the American Academy of Pediatrics—published guidelines for pediatric cancer centers in 1986, 1997, and 2004, significant changes in the delivery of health care have prompted a review of the role of medical centers in the care of pediatric patients. The potential effect of these changes on the treatment and survival rates of children with cancer led to this revision.

Much has changed since the first book Paediatric Oncology: Acute Nursing Care (1999), therefore, this new edition encompasses these changes in relation to the practice itself and the evidence that underpins it. Emphasis is placed on ensuring terminology is accurate, in keeping with the language of the current day. The book is divided into six sections:

## Acces PDF Paediatric Oncology Acute Nursing Care

Chemotherapy, Haematopoetic Stem Cell Transplantation, General Surgery, Radiotherapy, Late Effects of cancer therapies, and Palliative Care. There is a brief commentary at the end of each section/chapter by a ' novice ' author but experienced practitioner, highlighting to the reader what is already known and what the section/chapter adds to their current knowledge and practice.

The book addresses four modalities of treatment: chemotherapy, surgery, radiotherapy, and bone marrow transplant. Each of the four sections looks at specific areas including symptom management, complications, and late effects.

This comprehensive clinical handbook for nurses in paediatric haematology/oncology, contains in-depth information regarding patho-physiology, diagnosis, treatment, advanced assessment and interventions.

As the likely first responder in an emergency, you need quick access to essential information on the potential complications of many different cancer types and treatments. The new edition of this trusted resource provides up-to-date information on the pathophysiology, complications, risks, treatment approaches, prognosis, assessment findings, and nursing and medical interventions for a wide range of cancers. It also offers valuable information to help you fulfill your role as care coordinator and patient advocate, including client education guidelines, discharge procedures, and strategies for helping the client and family deal with the impact of the disease ' s progression. A consistent format throughout helps you quickly

find the information you need, no matter what the topic. This indispensable reference is written and reviewed by both oncology and acute care nurses, ensuring accuracy, currency, and clinical relevance. Coverage of each cancer includes pathophysiologic mechanisms, epidemiology and etiology, risk profile, prognosis, professional assessment criteria (PAC), nursing care and treatment, evidence-based practice update, patient teaching, nursing diagnoses or DSM-IV, evaluation and desired outcomes, and discharge planning with follow-up care, where needed. The latest prognosis statistics give you a realistic picture of the survival possibilities for your patients so you can provide the most appropriate nursing care and patient education. Multiple-choice review questions with answers and rationales at the end of each chapter help reinforce your understanding of key concepts and prepare you for certification examinations. Special boxes highlight pediatric-specific care considerations for working with children. Six new chapters — Biliary and Pancreatic Obstruction, Depression and Cognitive Dysfunction, Dyspnea and Airway Obstruction, GI Obstruction, Heart Failure, and Spiritual Distress — keep you up to date with the latest advances in oncology nursing. Evidence-based rationales in the nursing interventions help you apply the latest research findings to actual practice. Each chapter includes a new section on pathophysiology to help you understand the physiologic processes associated with each oncologic complication.

Holland-Frei Cancer Medicine, Ninth Edition, offers a balanced view of the most current knowledge of cancer science and clinical oncology practice. This all-new edition is the consummate reference source for medical oncologists, radiation oncologists, internists, surgical oncologists, and others who treat cancer patients. A translational perspective

information on bone marrow transplant, the immune system and palliative care Improved design and layout New expert contributors to provide the latest information on their field

This book presents the current state of the nursing science in topics relevant to the care of pediatric oncology patients and their families across the treatment trajectory and is framed within a precision health framework. The spectrum of topics covered is wide, including, for example, symptom management, self-care management, exercise and physical activity, family-centered care, palliative care, the role of the nurse in treatment decision making, patient and nurse resiliency, survivorship, and genetic counseling. Throughout, there is a focus on the implications of research for nursing practice, highlighting which elements of the available evidence are ready for translation into practice and which are not. In addition, careful attention is paid to the role that nursing can play in further advancing science through clinical research. The authors are leading experts from across the globe. The book will be of special interest for pediatric oncology nurses, including direct care nurses, research nurses, and nursing leaders, and will also be a stimulating source for researchers and non-oncology nurses.

Children and young people suffering from long-term conditions require continuing support and nursing care throughout their lives. *Nursing Care of Children and Young People with Chronic Illness* explores chronic disease management in the context of recent developments, including the National Service Framework for Children. It addresses the aetiology of chronic illness and the impact on the child's family. It also explores holistic approaches to caring for

## Acces PDF Paediatric Oncology Acute Nursing Care

their social, physical and psychological needs, and highlights the importance of the nurse ' s role in promoting children and their parents as ' expert patients ' . Nursing Care of Children and Young People with Chronic Illness is a comprehensive, up-to-date resource for nursing students and practitioners on the context, theory and practice of assessing health needs, and the delivery of holistic care and services within a variety of care settings, to enable them to meet the changing needs of children and young people with chronic illnesses and diseases, and their families. The first nursing-specific text related to the care of children & young people with chronic illness Incorporates case studies & scenarios throughout to enable readers to gain an understanding of the application of concepts & theories in practice Covers care aspects of the child and young person in different settings including tertiary, secondary, primary health care and the home Written in the context of the NSF for Children

Originally emanating from presentations at an international conference, this text brings together research and practice development from three perspectives: practice, management and education. Within these three sections the book presents a series of chapters written mainly by practitioners, but some in collaboration with academics. At the end of each section there is a commentary by a practitioner, manager or researcher, which aims to offer a helpful critique on the papers in their section, guiding the reader to consider other areas of research and practice development. At a time when practitioners are being called to produce and use evidence in their practice, this book should offer a valuable contribution to that evidence base.
