Christophe Basso's SMPS SPICE Cookbook is a complete designer's toolkit with tested, ready-to-run SPICE models on an accompanying CD-ROM. The models come in all three SPICE flavors with demo versions. You can start from scratch, installing the software and simulating the examples in the book without any SPICE experience whatsoever. All the common SMPS topologies are covered: buck, boost, buck-boost, and SEPIC. Each is described in terms of relative strengths and weaknesses and then modeled. Just turn to the CD, pull out the model in the flavor of SPICE you use, plug in your own values – and out comes a design solution. All the models in the book have been carefully simulated and tested. A special website even lets you access new models that will be posted on a continuing basis

A rousing call to action, this book will leave you feeling hopeful that we can make a difference in the midst of an age of turmoil, destruction, and uncertainty. The climate crisis, mass extinctions, political polarization, extreme inequality--the world faces terrifying challenges that threaten to divide us, yet Lily Cole argues that it is up to us to actively choose optimism, collaborate, make changes, and define what is possible. Cole writes: "We are the ancestors of our future. The choices we make now and the actions we take today will define and transform future generations." Having collaborated with experts working on solutions to humanity's biggest challenges, Cole distills a vision for a sustainable and peaceful future. She explores divisive issues from fast fashion to fast food and from renewable energy to gender equality, and interviews some of today's greatest influencers: Sir Paul McCartney (musician and activist), Elon Musk (CEO of SpaceX), Gail Bradbrook (cofounder of Extinction Rebellion), Farhana Yamin (climate change lawyer and activist), Emily Shuckburgh (climate scientist), Stella McCartney (sustainable fashion designer), Livia Firth (cofounder of Eco-Age), and Lisa Jackson (vice president of environment, policy and social initiatives at Apple, former Administrator of the EPA). The book also features a 32-page photo insert documenting Lily's experiences around the world, as well as the artists, activists, and others who have inspired her, and her own--as yet unpublished--photography.
