Creation of a constructive work is often driven by two types of forces. One, which directs, assists the artist by being physically present. The other force is the source of inspiration. In this piece of research undertaken by me, the impelling force has been my mother, late Prof. (Mrs) Sheetaltai Abasaheb Burghate . An academician herself, she always encouraged me to give my best. As a token of respect and admiration, which can never be adequately expressed, I dedicate this research project to her.

Public trust in research and its output is essential for a healthy modern society. Although the research enterprise is self-correcting, this self-regulation occasionally needs help. Over the years, research institutions, professional societies, and governments have established several protocols, codes of conduct, norms, and principles to enhance that trust in research institutions, funders, producers, publishers, and products. (Guidance Document GOOD ACADEMIC RESEARCH PRACTICES, September 2020, University Grants Commission- UGC) If the aim of a PhD is to develop the skills of a professional academic researcher, how should you go about it? Using the principles of skill development as a foundation, this book provides a unique approach to the most common challenges of PhD research, including: - getting to know the literature in your field - developing your research ideas - becoming a better academic writer - coping with the stress and unpredictability of research - publications and presentations - Writing, submitting and defending your thesis. This book ' A Complete Guide to PhD Degree: A Hand Book for Research Scholars and their Supervisors ' in an Indian Context is an outcome of not just efforts from the authors, but contributions by many Research Scholars. We take this opportunity to thank all those who supported in publication of this book. Many research scholars have been kind enough to share their research works in form of Synopsis, Thesis, Summary, Video of PhD Open Defence & Power-point presentations, MCQs in google from etc, so that a larger section of the aspiring researchers can take a guideline in formulation of their own research work. This Book also contains useful QR codes for direct link to various folders and files on the drive for Sample Ph.D Thesis, Synopsis , Summary, Videos of Open Defence Exam, Google form MCQs for Entrance Test & Pre-PhD Course work Exam, PPT Presentation etc, Syllabi for UGC NET Paper-I, MHRDC- Pre-Phd Course Work & important websites related to PhD. First and the foremost we are thankful to Dr.B.B. Taywade, Ex-Principal, Dhanwate National College, Nagpur who is the guiding and inspiring force for us and for encouraging us to take up such types of academic endeavour. He is in a true sense the mentor and a philosopher for us. We are thankful to Harshal Dharmare and Nidhi Somani faculty of BBA, DNC for helping us in manuscript preparation and proofreading of this book. We owe to many authors and websites whose writings formed the basis for this book. Our special acknowledgment and thanks to Indira Gandhi Open University, New Delhi and their open source websites www.ignou.ac.in & www.egyankosh.ac.in . We also take this opportunity to thank Eliva Press SRL Chisinau, Moldova, Europe for the publication of this book. At the end we would like to say that there is always a room for improvement in whatever we do. We would appreciate any suggestions and feedback regarding this book from the readers on mukulburghate@gmail.com so that the book can be made more interesting and meaningful.

Preface UGC NET exam pattern 2022 has been released by National Testing Agency (NTA) along with the official notification. As per the UGC NET 2022 exam pattern, the exam consists of two papers- Paper 1 and Paper 2. Both papers are comprised of objective-type multiple-choice questions (MCQs). There is no break between Paper 1 and 2. The exam will be conducted in Computer Based Test (CBT) mode. The medium of the UGC NET question paper is in English and Hindi languages only. Till December 2018, the UGC NET exam pattern was such that the test consisted of two papers (Paper 1 and 2) that were conducted in two different sessions. Candidates had to complete both the papers (Paper 1 and 2) in a duration of one and two hours, respectively. However, in June 2019, NTA changed the exam pattern as per which candidates now have to give both the papers in a single three-hour duration.In UGC NET Paper 1, the official website of NTA informs, "The questions will be generic in nature, intending to assess the teaching/research aptitude of the candidate. It will primarily be designed to test reasoning ability, comprehension, divergent thinking and general awareness of the candidate."This book ' A Handbook for General Paper on Teaching & Research Aptitude (Paper -I) of UGC-NET & PET Exams: A Crash Course for all Aspiring Students ' (For All 101 Subjects) is an outcome of not just efforts from the authors, but contributions by many Research Scholars. We take this opportunity to thank all those who supported in publication of this book. Many research scholars have been kind enough to share their research works in form of Video sessions on Teaching & Research Aptitude, Power-point presentations, MCQs in google from etc, so that a larger section of the aspiring students can take a guideline in preparing for the exams.This Book also contains useful QR codes for direct link to various folders and files on the drive for Syllabi for UGC NET Paper-I & Various MCQ ' s on different Open-source websites.We owe to many authors and websites whose writings formed the basis for this book. Our special acknowledgment and thanks to Indira Gandhi Open University, New Delhi and their open source websites www.ignou.ac.in & www.egyankosh.ac.in . We also take this opportunity to thank Amazon and Kindle Publishing for the publication of this book. At the end we would like to say that there is always a room for improvement in whatever we do. We would appreciate any suggestions and feedback regarding this book from the readers on mukulburghate@gmail.com so that the book can be made more interesting and meaningful. The widespread opinion is that Northrop Frye ' s influence reached its zenith in the 1960s and 1970s, after which point he became obsolete, his work buried in obscurity. This almost universal opinion is summed up in Terry Eagleton ' s 1983 rhetorical question, "Who now reads Frye?" In The Reception of Northrop Frye, Robert D. Denham catalogues what has been written about Frye – books, articles, translations, dissertations and theses, and reviews – in order to demonstrate that the attention Frye ' s work has received from the beginning has progressed at a geomantic rate. Denham also explores what we can discover once we have a fairly complete record of Frye ' s reception in front of us – such as Hayden White ' s theory of emplotments applied to historical writing and Byron Alm é n ' s theory of musical narrative. The sheer quantity of what has been written about Frye reveals that the only valid response to Eagleton ' s rhetorical question is "a very large and growing number," the growth being not incremental but exponential.

Information is considered essential in every business model. Effective usage of this information to direct goals and drive missions can lead to successful enterprises. Knowledge Integration Strategies for Entrepreneurship and Sustainability is a critical reference source that expounds upon the critical methods in which new information is integrated into existing models for starting new companies and the ways in which these models interact and affect each other. Featuring coverage on a broad range of topics, such as tacit knowledge utilization, knowledge retention in small and medium-sized enterprises (SMEs), and knowledge dynamics in supply chain management, this book is geared toward academicians, researchers, and students seeking current research on the effect of information management in the interdisciplinary world of business creation as well as enterprise stability and longevity.

The shortcomings of modern cryptography and its weaknesses against computers that are becoming more powerful necessitate serious consideration of more robust security options. Quantum cryptography is sound, and its practical implementations are becoming more mature. Many applications can use quantum cryptography as a backbone, including key distribution, secure direct communications, large prime factorization, e-commerce, e-governance, quantum internet, and more. For this reason, quantum cryptography is gaining interest and importance among computer and security professionals. Quantum Cryptography and the Future of Cyber Security is an essential scholarly resource that provides the latest research and advancements in cryptography and cyber

security through quantum applications. Highlighting a wide range of topics such as e-commerce, machine learning, and privacy, this book is ideal for security analysts, systems engineers, software security engineers, data scientists, vulnerability analysts, professionals, academicians, researchers, security professionals, policymakers, and students.

The delivery and availability of information resources is a vital concern to professionals across multiple fields. This is particularly vital to data intensive professions, where easy accessibility to high-quality information is a crucial component of their research. Library and Information Services for Bioinformatics Education and Research is an authoritative reference source for the latest scholarly material on the role of libraries for the effective delivery of information resources to optimize the study of biological data. Highlighting innovative perspectives across a range of topics, such as user assessment, collection development, and information accessibility, this publication is ideally designed for professionals, managers, computer scientists, graduate students, and practitioners actively involved in the field of bioinformatics.

Master's Thesis from the year 2006 in the subject Computer Science - Bioinformatics, , language: English, abstract: Data mining, the extraction of hidden predictive information from large databases, is a powerful new technology with great potential to help companies focus on the most important information in their data warehouses. Data mining tools predict future trends and behaviors allowing businesses to make proactive, knowledge-driven decisions. Data mining tools can answer business questions that traditionally were too time-consuming to resolve. They scour databases for hidden patterns, finding predictive information that experts may miss because it lies outside their expectation. Automated pattern matching- the ability of a program to compare known patterns and determine the degree of similarity – forms the basis for automated sequence analysis, modeling of protein structures, locating homologous genes, data mining, Internet search engines etc. in bioinformatics. Data mining relies on algorithm pattern matching to locate patterns in online and local databases, using a variety of technologies, from simple keyword matching to rule based expert system and artificial neural networks. In this dissertation, the basic problems related to pattern reorganization and pattern matching for nucleotide and protein sequence alignment are discussed. The main techniques used to solve these problems and a comprehensive survey of most influential algorithms that were proposed during the last decay is described.

This book highlights the impacts of COVID-19 on the global economy, at a time when the world economy has experienced large demand and supply shocks. To limit the transmission of the corona virus, all governments shut down production, restricted movement of people, etc, which led to severe curtailment in demand, and disruptions in supply chains all over the world. The COVID-19 pandemic has dragged the world economy into an abrupt and unforeseen recession. According to IMF estimates, world GDP will fall by over 3 percent due to the outbreak of this pandemic - the steepest slowdown since the Great Depression of the 1930s. The ILO has predicted a loss of about 25 million jobs due to this pandemic. Emerging markets will lose at least 2.4 percent of their GDP in 2020 alone. Loss in global travel revenue due to COVID-19 is estimated at USD 810.7 billion. Financial markets have been badly hit and about USD 83 million has been pulled out of developing markets since the outbreak of COVID-19. The list of sectors impacted by the COVID-19 outbreak, is endless All governments have announced stimulus packages comprising a mix of fiscal and monetary measures, but it is difficult to predict how quickly businesses will respond to these measures. The papers in this book, which are the proceedings of an online global conference, have attempted to analyze and summarize the thoughts of academicians on these vexed issues.

HEALTH BALANCE IS DISTURBED DUE TO VARIOUS REASONS SUCH AS CHANGE IN FOOD, SEASON, ILLNESS. SIMPLE REMEDIES BY USING SPICES, HERBS IS DESCRIBED FOR SEVERAL DISEASES. INFORMATION ON HERBS IS DESCRIBED IN DETAIL. KITCHEN PHARMACY IS USEFUL SECTION OF THIS BOOK WHICH EXPLAINS PREPARATION OF SIMPLE MEDICINES.
