knowledge of core beliefs, teachings and practices of at least two religions, with an understanding of how they can be applied to philosophical and ethical themes.

A century that began with modernism sweeping across Europe is ending with a remarkable resurgence of religious beliefs and practices throughout the world. Wherever one looks today, from headlines about political turmoil in the Middle East to pop music and videos, one cannot escape the pivotal role of religious beliefs and practices in shaping selves, societies, and cultures. Following in the very successful tradition of *Critical Terms for Literary Studies* and *Critical Terms for Art History*, this book attempts to provide a revitalized, self-aware vocabulary with which this bewildering religious diversity can be accurately described and responsibly discussed. Leading scholars working in a variety of traditions demonstrate through their incisive discussions that even our most basic terms for understanding religion are not neutral but carry specific historical and conceptual freight. These essays adopt the approach that has won this book's predecessors such widespread acclaim: each provides a concise history of a critical term, explores the issues raised by the term, and puts the term to use in an analysis of a religious work, practice, or event. Moving across Judaism, Christianity, Hinduism, Buddhism, Islam, and Native American and Mayan religions, contributors explore terms ranging from experience, territory, and image, to God, sacrifice, and transgression. The result is

an essential reference that will reshape the field of religious studies and transform the way in which religion is understood by scholars from all disciplines, including anthropology, sociology, psychology, cultural studies, gender studies, and literary studies.

Studying religion in college or university? This book shows you how to perform well on your course tests and examinations, write successful papers, and participate meaningfully in class discussions. You'll learn new skills and also enhance existing ones, which you can put into practice with in-text exercises and assignments. Written by two award-winning instructors, this book identifies the close reading of texts, material culture, and religious actions as the fundamental skill for the study of religion at undergraduate level. It shows how critical analytical thinking about religious actions and ideas is founded on careful, patient, yet creative "reading" of religious stories, rituals, objects, and spaces. The book leads you through the description, analysis, and interpretation of examples from multiple historical periods, cultures, and religious traditions, including primary source material such as Matthew 6:9-13 (the Lord's Prayer), the gohonzon scroll of the Japanese new religion Soka Gakkai, and the pilgrimage to Mecca (hajj). It provides you with typical assignments you will encounter in your studies, showing you how you might approach tasks such as reflective, interpretive or summary essays. Further resources, found on the book's website, include bibliographies, and links to useful podcasts.

Spanning the gamut from "Aaron" to "Zwingli," this dictionary includes nearly 3,000 entries written by about sixty authors, all of whom are specialists in their various theological and religious disciplines. The editors have designed the dictionary especially to aid the introductory-level student with instant access to definitions of terms likely to be encountered in, but not to substitute for, classroom presentations or reading assignments. - Publisher.

'Theory for Religious Studies' takes major theoretical writers in the humanities & social sciences, & explains their relevance to the study of religion.

Worldview Religious Studies brings the study of religion, spirituality, secularism, and other mixed attitudes of life under the overarching scheme of worldview studies. This book introduces and defines worldviews more generally before establishing a framework specific to religious studies. The drive for meaning-making is explored through ritual-symbolic activities, ideas of 'play', and the power of emotions to transform simple ideas into values and beliefs that frame identity and signpost destiny. Identity and its sacralisation are discussed alongside gift/reciprocity theory in their relation to ideas of merit, karma, and salvation in Eastern and Western traditions. This theoretical background is used to introduce a new classification of worldviews - natural, scientific, ancestral, karmic, prophetic-sectarian, mystical, and ideological. Organised thematically by chapter, this book

brings together familiar and unfamiliar authors, theories, and sources to challenge students and teachers of Religious Studies, Theology, and Ethics. It introduces worldview religious studies as a framework through which to re-think human endeavours to identify, cope and even transcend life's flaws and perils.

In recent years there has been an intensifying debate within the religious studies community about the validity of religion as an analytical category. In this book Fitzgerald sides with those who argue that the concept of religion itself should be abandoned. On the basis of his own research in India and Japan, and through a detailed analysis of the use of religion in a wide range of scholarly texts, the author maintains that the comparative study of religion is really a form of liberal ecumenical theology. By pretending to be a science, religion significantly distorts socio-cultural analysis. He suggest, however, that religious studies can be re-represented in a way which opens up new and productive theoretical connections with anthropology and cultural and literary studies.

Drawing on recent developments in the comparative study of religion, this book explores the trends of the past sixty years from a global perspective. Each of the ten chapters covers the study of religion in a different region of the world, from Europe and the Americas to Asia and the Far East. Topics covered include: local background to the study of religions formation of religious studies in the region important thinkers and writings institutions interregional diversity and interregional

connections emerging issues. This book is a major contribution to the field of religious studies and a valuable reference for scholars, researchers and graduate students.

Religious Studies and Rabbinics have overlapping yet distinct interests, subject matter, and methods. Religious Studies is committed to the study of religion writ large. It develops theories and methods intended to apply across religious traditions. Rabbinics, by contrast, is dedicated to a defined set of texts produced by the rabbinic movement of late antiquity. Religious Studies and Rabbinics represents the first sustained effort to create a conversation between these two academic fields. In one trajectory of argument, the book shows what is gained when each field sees how the other engages the same questions: When did the concept of "religion" arise? How should a scholar's normative commitments interact with their scholarship? The book argues that if scholars from Religious Studies and Rabbinics do not realize they are addressing the same problems, they will not benefit from each other's solutions. A second line of argument brings research methods, theoretical claims, and data associated with one field into contact with those of the other. When Religious Studies categories such as "ritual" or "the sacred" are applied to data from Rabbinics and, conversely, when text-reading strategies distinctive to Rabbinics are employed for texts from other traditions, both Religious Studies and Rabbinics enlarge their scope. The chapters range across such themes as ritual failure; rabbinic conceptions of scripture,

ethics, food, time, and everyday life; problems of definition and normativity in the study of religion; J.Z. Smith's writings; and the preaching of the African-American Christian evangelical social justice activist John Perkins. With chapters written by world-class theorists of Religious Studies and prominent text scholars of Rabbis, the book provides a unique opportunity to expand the conceptual reach and scholarly audience of both Religious Studies and Jewish Studies.

This book looks at how religious studies is framed and taught in India. It addresses the contradiction between the country's vibrant religious life and the dearth of comparative and social scientific religious studies programs across Indian universities. The volume:

- Studies the efforts by Rabindranath Tagore in Santiniketan and Mohan Malaviya in Varanasi, to introduce and institutionalize religious studies in India;
- Discusses the notions of religion and spirituality and situates the failure of the 'secularization thesis' in the context of modern India;
- Provides concrete suggestions on how to develop religious studies in relation to global citizenship and Indian cultural heritage with the hope of initiating a larger discussion.

A unique contribution to the study of religion in society and education, the book will be indispensable to students and researchers of theology, history, philosophy, sociology, secularization, globalization, religious studies, education studies, and South Asian studies.
