SOAP for Family Medicine features 90 clinical problems with each case presented in an easy to read 2-page layout. Each step presents information on how that case would likely be handled. Questions under each category teach the students important steps in clinical care. Blackwell's new SOAP series is a unique resource that also provides a step-by-step guide to learning how to properly document patient care. Covering the problems most commonly encountered on the wards, the text uses the familiar "SOAP" note format to record important clinical information and guide patient care. SOAP format puts the emphasis back on the patient's clinical problem not the diagnosis. This series is a practical learning tool for proper clinical care, improving communication between physicians, and accurate documentation. The books not only teach students what to do, but also help them understand why. Students will find these books a "must have" to keep in their white coat pockets for wards and clinics.

Featuring over 1,300 full-color illustrations, this atlas is a comprehensive, hands-on guide to more than 100 medical procedures most commonly performed in an office setting. The book presents step-by-step instructions and illustrations for each procedure and discusses strategies for avoiding common pitfalls. Each chapter includes ordering information for necessary equipment or supplies, CPT codes, ICD-9 codes, global periods, and average U.S. fees for each procedure. Some chapters also refer the practitioner to patient education handouts that will appear online. A companion Website will offer the fully searchable text, over 100 patient education handouts, and videos of ten common procedures.

Ideal for medical students, PAs and NPs, this pocket-sized quick reference helps students hone the clinical reasoning and documentation skills needed for effective practice in internal medicine, pediatrics, OB/GYN, surgery, emergency medicine, and psychiatry. This updated edition offers step-by-step guidance on how to properly document patient care as it addresses the most common clinical problems encountered on the wards and clinics. Emphasizing the patient's clinical problem, not the diagnosis, the book's at-a-glance, two-page layout uses the familiar SOAP note format.

A SOAP note records an encounter with a patient. The components are Subjective (what the patient tells the recorder), Objective (what the recorder observes), Assessment (recorder's summation), Plan (recorder's actions, based on the assessment).

Develop all of the skills you need to write clear, concise, and defensible patient/client care notes using a variety of tools, including SOAP notes. This is the ideal resource for any health care professional needing to learn or improve their skills—with simple, straight forward explanations of the hows and whys of documentation. It also keeps pace with the changes in Physical Therapy practice today, emphasizing the Patient/Client Management and WHO's ICF model.
