enough to be amusing, but not so trivial as to spoil the fun.” This is exactly the approach of this book in making the science of ‘soft matter’ relevant to everyday life things such as the food we eat, the plastic we use, the concrete we build with, the cells we are made of.

#1 NEW YORK TIMES BESTSELLER When and how did the universe begin? Why are we here? What is the nature of reality? Is the apparent “grand design” of our universe evidence of a benevolent creator who set things in motion—or does science offer another explanation? In this startling and lavishly illustrated book, Stephen Hawking and Leonard Mlodinow present the most recent scientific thinking about these and other abiding mysteries of the universe, in

nontechnical language marked by brilliance and simplicity. According to quantum theory, the cosmos does not have just a single existence or history. The authors explain that we ourselves are the product of quantum fluctuations in the early universe, and show how quantum theory predicts the “multiverse”—the idea that ours is just one of many universes that appeared spontaneously out of nothing, each with different laws of nature. They conclude with a riveting assessment of M-theory, an explanation of the laws governing our universe that is currently the only viable candidate for a “theory of everything”: the unified theory that Einstein was looking for, which, if confirmed, would represent the ultimate triumph of human reason.

with the Starfleet science vessel Newton. Jean-Luc Picard and his crew have been ordered to assist the Newton with the final phase of its current mission—a mission that brings Picard face to face with something he never thought he would see again: the phenomenon known as the Nexus. Less than twelve years after it left the Alpha Quadrant, the Nexus ribbon has now returned. Tasked to track and study the phenomenon as it re-entered the galaxy, the specialist science team on the Newton discovered that the orbital path of the Nexus has been radically altered by the actions of the rogue El-Aurian Tolian Soren—taking it deep into the territory of The Holy Order of the Kinshaya, one of the key members of the Typhon Pact. published in 1999, it comprises ninety-nine sketches of life just after the handover of the former British colony to China. Each of these stories in miniature begins from a piece of ephemera, usually consumer products or pop culture phenomena, and develops alternately comic and poignant snapshots of urban life. Dung's sketches center on once-trendy items that evoke the world at the turn of the millennium, such as Hello Kitty, Final Fantasy VIII, a Windows 98 disk, a clamshell mobile phone, Air Jordans, and cargo shorts. The protagonist of each piece, typically a young woman, is struck by an odd, even overriding obsession with an object or fad. Characters embark on brief dalliances or relationships lasting no longer than the fashions that sparked them. Dung blends vivid everyday details—Portuguese egg

tarts, Japanese TV shows, the Hong Kong subway—with situations that are often fantastical or preposterous. This catalog of vanished products illuminates how people use objects to define and even invent their own selves. A major work from one of Hong Kong's most gifted and original writers, Dung's archaeology of the end of the twentieth century speaks to perennial questions about consumerism, nostalgia, and identity.
