What The CEO Wants You To Know The highly respected author Ram Charan has taught business at Harvard and Northwestern universities. In his best-selling book, he describes universal business principles that help all companies make money.

What The CEO Wants You To Know - David Ratcliffe

What the CEO Wants You to Know captures these insights and explains in clear, simple language how to do what great CEOs do instinctively and persistently: Understand the basic building blocks of a business and use them to figure out how your company makes money and operates as a total business.

Charan has seen the business world from both ends of the spectrum. While growing up in India, working in his family shoe business, he came to understand how a business works and the critical elements of success. A powerful lesson in what is really important in business, this remarkable book takes the lessons of the peddler and reveals how they can be used by the rest of us.

'The most influential consultant alive.' Fortune Have you ever noticed that the best CEOs seem to have a special kind of intelligence, an ability to sense where the opportunities in their industries are and how to take advantage of them? The best have a knack for simplifying the most complex business practices down to the fundamentals - the same fundamentals of the small family business. In What the CEO Wants You To Know, Ram Charan explains in clear, simple language how to do what great CEOs do instinctively and persistently - understand the basic building blocks of a company and use them to figure out how to make it work as a total business. Being able to decide what to do when, despite the clutter of day-to-day to-do lists and the complexity of the real world, takes the mystery out of business and offers a clear road map of organisational success. First published in 2001 (with over 300,000 copies sold worldwide) but never before published in the UK, this business classic has been completely rewritten and updated with new stories from today's market leaders and companies, and the latest insights from the cutting edge of management research. 'One of the world's most renowned management consultants and authors.' Fast Company

Describes how corporations work and reviews the critical elements of business success--growth, return on assets, rate of inventory turnover, understanding customers, and taking advantage of the changing marketplace.

The classic on the universal laws of business success, completely revised and updated for today's leaders Completely rewritten for today's business world, What the CEO Wants You to Know, expanded and updated, written by bestselling author Ram Charan, describes the fundamentals behind every business, from street vendors in Mumbai, to Fortune 500 companies. Drawing on stories from Uber, Amazon, Apple, Toyota, Netflix, Lyft, The Limited, Walmart, GE and Starbucks, Charan, in the most accessible language imaginable, explains the ins and outs of how companies work, from gross revenue and operating costs, to inventory and cash flow, from turnover, profits and margins, to return on capital and accounts payable and receivable, from product quality to sales. A classic in the business literature, with hundreds of thousands of copies in print, this short and engaging book is like a miniature MBA course between covers. For everyone who wants to master and understand the levers that drive a successful business, What the CEO Wants You to Know is the perfect answer.

#1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you're running an entire company or in your first management job. "A must-read for anyone who cares about business."--The New York Times When Execution was first published, it changed the way we did our jobs by focusing on the critical importance of "the discipline of execution": the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future: • Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge. • Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management. • Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation. • Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a "vision" and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world--including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup--Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.

From the bestselling author of What the CEO Wants You to Know? How to rethink sales from the outside in We have to face the truth: the process of selling is broken. Customers have more choices and are under intense pressure. Yet few companies are facing this reality. When they don't, a lingering malaise sets in. More than ever these days, the sales process tends to be a war about price--a frustrating, unpleasant war that takes all the fun out of selling. But there's a better way to think about sales, says bestselling author Ram Charan, who is famous for clarifying and simplifying difficult business problems. What the customer wants you to know is how his or her business works, so you can help make it work better. It sounds simple, but there's a catch: you won't be able to do that with your traditional sales approach. Instead of starting with your product or service, start with your customer's problems. Focus on becoming your customer's trusted partner, someone he can turn to for creative, cost-effective solutions that are based on your deep knowledge of his values, goals, problems, and customers. This book defines a new approach to selling which Charan calls value creation selling--that while radical is nonetheless practical. VCS has been battle-tested in companies in a variety of industries, such as Unifi, Mead-Westvaco, and Thomson Financial. It will enable you to: • Gain a deeper knowledge of your customer's problems • Understand how your customer's company really makes decisions • Help your customer improve margins and drive revenue growth • Connect sales with other key functions such as finance and manufacturing • Come up with new customized offerings • Make price much less of an issue VCS gets you out of the hell of commoditization and low prices. It differentiates you from the competition, paving the way to better pricing, better margins, and higher revenue growth, built on win-win relationships that deepen over time. Someday, every company will listen more closely to the customer, and every manager will realize that sales is everyone's business, not just the sales department's. In the meantime, this eye-opening book will show you how to get started.

The new grand theory of leadership by Ram Charan . . . The breakthrough book that links know-how--the skills of people who know what they are doing--with the personal and psychological traits of the successful leader. How often have you heard someone with a commanding presence deliver a bold vision that turned out to be nothing more than rhetoric and hot air? All too often we mistake the appearance of leadership for the real deal. Without a doubt, intelligence, vision, and the ability to communicate are important. But something big is missing: the know-how of running a business--the capacity to take it in the right direction, do the right things, make the right decisions, deliver results, and leave the people and the business better off than they were before. For well over four decades, Ram Charan has been learning in the most visceral way the underlying reasons why leaders succeed and fail. As one of the most influential advisers to top management teams of leading companies around the world, he has had a front-row seat to observe the cause and effect of leadership practices and behaviors. Ram Charan's insight into the real content of leadership provides you with the eight fundamental skills needed for success in the twenty-first century: • Positioning (and, when necessary, repositioning) your business by zeroing in on the central idea that meets customer needs and makes money • Connecting the dots by pinpointing patterns of external change ahead of others • Shaping the way people work together by leading the social system of your business • Judging people by getting to the truth of a person • Molding high-energy, high-powered, high-ego people into a working team of leaders in which they equal more than the sum of their parts • Knowing the destination where you want to take your business by developing goals that balance what the business can become with what it can realistically achieve • Setting laser-sharp priorities that become the road map for meeting your goals • Dealing creatively and positively with societal pressures that go beyond the economic value creation activities of your business Know-How is the missing link of leadership. By showing how the eight know-hows link to, interact with, and reinforce personal and psychological traits, Ram Charan provides a holistic and innovative portrait of successful leaders of the twenty-first century.

"Based on extensive interviews with today's . . . corporate leaders, this look at how the best CEOs do their jobs focuses on the mindsets and actions that foster an environment of excellence"--

NEW YORK TIMES AND WALL STREET JOURNAL BESTSELLER • Winner of CMI Management Book of the Year 2019 Based on an in-depth analysis of over 2,600 leaders drawn from a database of more than 17,000 CEOs and C-suite executives, as well 13,000 hours of interviews, and two decades of experience advising CEOs and executive boards, Elena L. Botelho and Kim R. Powell overturn the myths about what it takes to get to the top and succeed. Their groundbreaking research was the featured cover story in the May-June 2017 issue of Harvard Business Review. It reveals the common attributes and counterintuitive choices that set apart successful CEOs--lessons that we can apply to our own careers. Much of what we hear about who gets to the top, and how, is wrong. Those who become chief executives set their sights on the C-suite at an early age. In fact, over 70 percent of the CEOs didn't have designs on the corner office until later in their careers. You must graduate from an elite college. In fact, only 7 percent of CEOs in the dataset are Ivy League graduates--and 8 percent didn't graduate from college at all. To become a CEO you need a flawless résumé. The reality: 45 percent of CEO candidates had at least one major career blowup. What those who reach the top do share are four key behaviors that anyone can master: they

are decisive; they are reliable, delivering what they promised when they promise it, without exception; they adapt boldly, and they engage with stakeholders without shying away from conflict. Based on this breakthrough study of the most successful people in business, Botelho and Powell offer career advice for everyone who aspires to get ahead. Based on research insights illustrated by real life stories from CEOs and boardrooms, they tell us how to: - Fast-track our career by deploying the career catapults used by those who get to the top quickly - Overcome the hidden handicaps to getting the job we want. - Avoid the 5 hazards that most commonly derail those promoted into a new role. For everyone who aspires to rise up through the organization and achieve their full potential, The CEO Next Door is an essential guide.

Confronting Reality will change the way you think about and run your business. It is the first book that shows how to connect the big picture of the new era of business with the nitty-gritty of what to do about it. Through a completely new way to understand and use the business model as the primary tool for confronting reality—a breakthrough that will become the management innovation of this decade—you'll know sooner rather than later whether your fundamental business premise is under assault, where your best opportunities lie, what you should change and what you should leave alone, and how to realistically plan the future of your business. The fundamentals of how a business makes money are being rapidly and permanently altered by sweeping structural changes. With their extraordinary depth and breadth of experience, Larry Bossidy and Ram Charan are the ideal guides for everyone—entrepreneur, mid-level manager, or CEO—about what is to be done so you can get things right in this challenging, radically changed world. They start by showing you how to understand the most fundamental element of any business: whether you can realistically make the money you hope to in the game you're playing. Bossidy and Charan show how to use the business model to develop a robust, reality-based process for thinking about the specifics of your business in a holistic way. They show how to tie together the financial targets you must meet, the external realities you face, and internal activities such as strategy development, operating tactics, and selection and development of people. Through the lens of the business model, as well as the skillful use of initiatives and development of people with the right leadership characteristics, you'll see how Robert Nardelli at Home Depot, Jim McNerney at 3M, Dick Harrington at the Thomson Corporation, Michael Wisbrun at KLM, Joseph Tucci at EMC, and John Chambers at Cisco confronted reality. Whether they faced crisis or opportunity, all made the right kinds of changes through a combination of business savvy (the art of understanding the fundamentals driving a business) and business model thinking.
